

Patriot Services Corporation finishes Critical Infrastructure Project for Seminole County, Florida

Contact: Stephen M. Potter
Phone: (248) 232-3588
Date: 3/14/2006

Clawson, MI. With the release of the National Strategy for Critical Infrastructure Preparedness, communities are increasingly identifying critical infrastructure in their communities and developing plans for their protection. When Seminole County, Florida looked for experts in this field, they turned to Patriot Services Corporation of Clawson, Michigan. Patriot Services is led by the retired Undersheriff of Oakland County and two former senior officers of the Pentagon Force Protection Agency an organization charged with protection of the United States' most Critical Infrastructure, the Pentagon.

Patriot Services was selected in open competition against several larger emergency preparedness and security corporations from across the United States. This seven month contract, conducted from June through December 2005, and included vulnerability assessments of 90 facilities and hundreds of individual buildings. This contract required Patriot Services Corporation to implement the Homeland Security Comprehensive Assessment Methodology (HLS-CAM) to identify risks, threats, and vulnerabilities and provide recommendations for overall security and preparedness improvements.

Patriot Services Corporation continues to exceed client expectations in an ever expanding and increasing scope of projects in Michigan, New Jersey, Ohio, and Nevada.

Patriot Services Corporation is a 100% veteran owned business that provides specialized advisory services regarding homeland security, business continuity, and emergency preparedness requirements including: critical infrastructure protection, NIMS Compliance, large scale exercise design and evaluation, and custom designed or FEMA/DHS approved training courses. Patriot Services currently has clients and project work in Nevada, Ohio, Michigan and New Jersey and is expanding throughout the county.

If you would like Patriot Services Corporation to assist your organization with critical infrastructure protection planning including security and vulnerability assessments, virtual pre-planning, target and facility hardening, and RED team assessments. Please contact our leadership at 248.232.3588.
